

Unit 3: More

[UNDER CONSTRUCTION]

This is an example of using qmd as the source document with pdf as one target. I've taken out the qmd stuff that doesn't seem to render to pdf.

Evaluated Python code chunk, with a plot

```
import numpy as np
x = np.random.normal(size=100)
import matplotlib.pyplot as plt
plt.hist(x)
plt.show()
np.mean(x)
```

-0.1163787208802502

LaTeX

$$\theta = \int_0^{\infty} f(x, \theta) d\theta$$

LaTeX macro

Warning: having `include-before-body` in the yml header of this file, as seemingly needed to enable macros, causes extra space at top of page.

$$A = X^{\mathsf{T}}Y$$
